

INSIGHT

Where Knowledge Becomes Power

Logistics HealthCheck™

Insight Group Technologies Inc. has developed a unique 100-point reference check, to confirm or benchmark the efficiency of your company's logistics operations. The key areas of focus include space utilization, labor efficiencies, transportation and overall throughput calculations. A detailed report of your business will be prepared based on comparisons to global best practices and measures, and how your organization's key performance indicators relate to other companies in your business sector.

The following are a few of the areas of evaluation;

Warehouse Operations

Activities and Characteristics

Warehouse Utilization

Storage and Handling

Transport

Courier, LTL, FTL, others

Commercial Profile

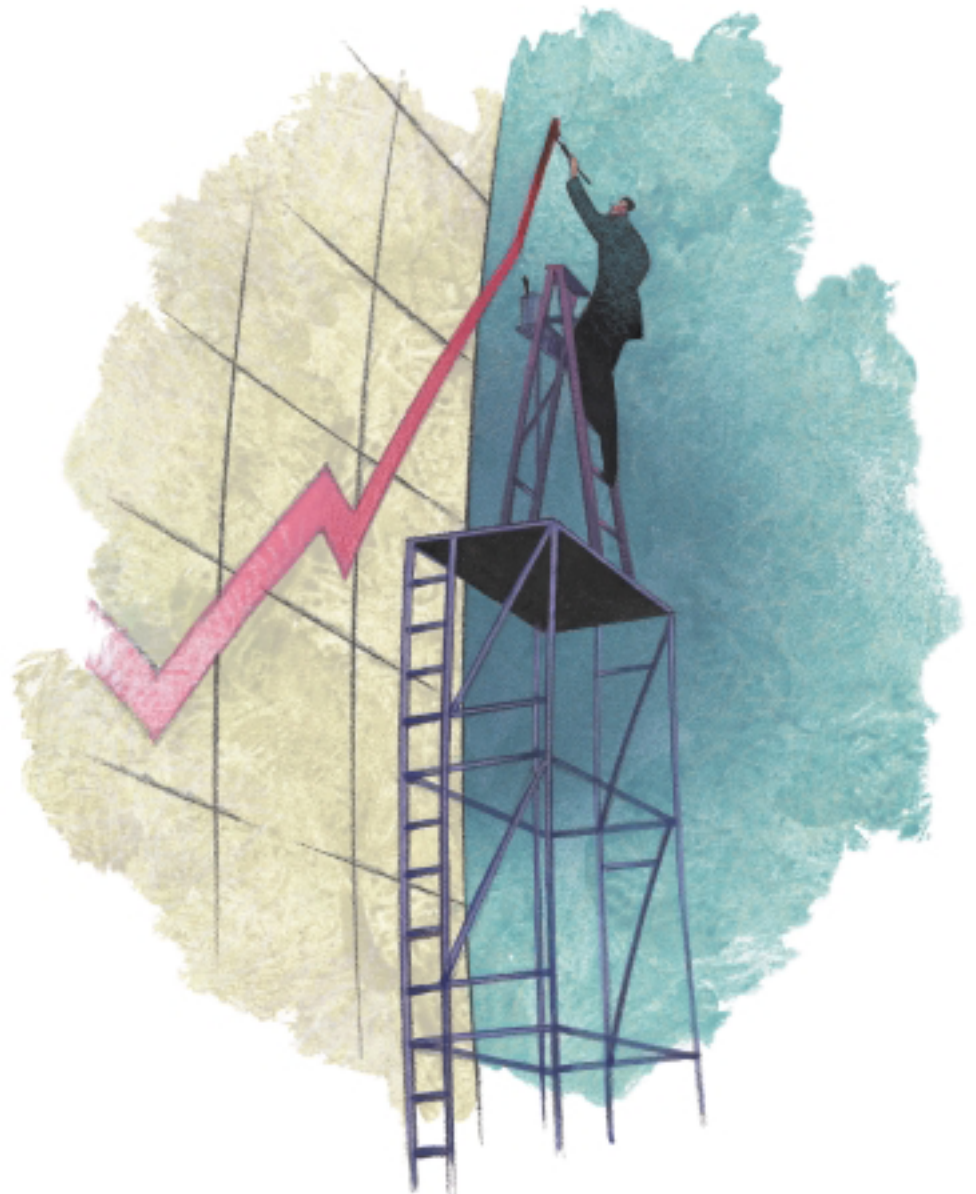

Type, Sales, Profitability,
Human Resources

Systems

Inventory, Tracking, Order Entry,
WMS capabilities, TMS

Purchasing/Production

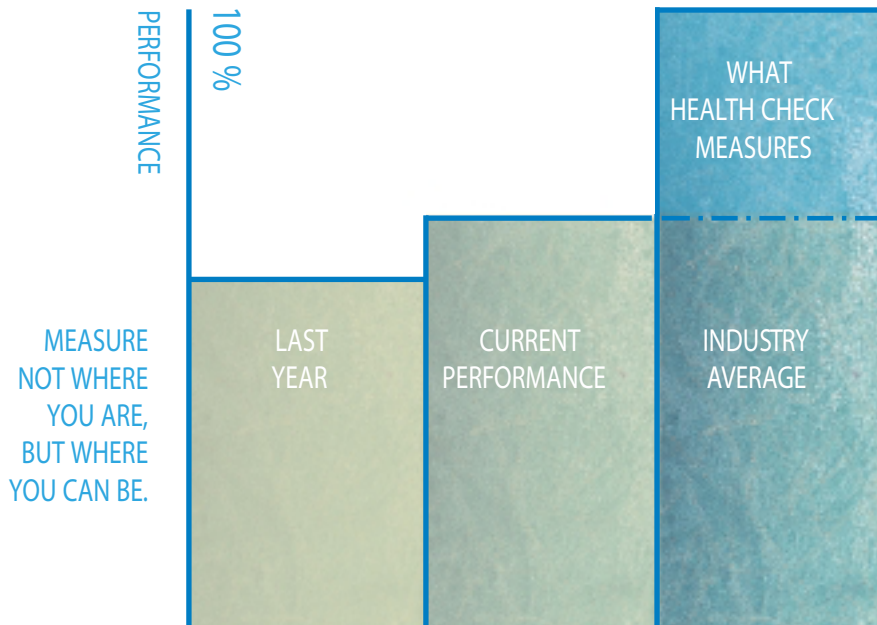

Cycle time, Replenishment Activities,
Service Levels and Key Performance
Indicators

INSIGHT

Where Knowledge Becomes Power

Major Benefits:

- On average, Insight finds from 5-20% operational savings per client
- Receive the benefit of global experience working directly for you
- Create Internal Business case or ROI from HealthCheck™ for capital or restructuring projects
